Networks (ISSN: 0028-3045) is published seven times a year: Jan., March, May, July, Aug., Oct., and Dec., one volume per year, by John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158.

Copyright © 1992 by John Wiley & Sons, Inc. All rights reserved. Reproduction or translation of any part of this work beyond that permitted by Sections 107 and 108 of the U.S. Copyright Law without the permission of the copyright owner is unlawful. Second-class postage paid at New York, NY, and at additional mailing offices.

The code and the copyright notice appearing at the bottom of the first page of an item in the journal indicate the copyright holder's consent that copies may be made for personal or internal use, or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 and 108 of the United States Copyright Law. The per-copy fee for each item is to be paid through the Copyright Clearance Center, Inc., 21 Congress St., Salem, MA 01970.

This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Such permission requests and other permission inquiries should be addressed to the Permissions Dept.

Subscription price (1992): $390.00 U.S.A.; $477.50 outside U.S.A. (includes postage and handling). Back volumes, microfilm, and microfiche are available for previous years; requested price list from publisher. Please allow four weeks for processing a change of address.

Claims for undelivered copies will be accepted only after the following issue has been received. Please enclose a copy of the mailing label or cite your subscriber reference number in order to expedite handling. Missing copies will be supplied when losses have been sustained in transit and where reserve stock permits.

Postmaster: Send address changes to *Networks*, Susan Malawski, Fulfillment Manager, Subscription Department, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158. For subscription inquiries, please call customer service at (212) 850-6645 or write to the above address.

Advertising Sales: Inquiries concerning advertising should be forwarded to Roberta Frederick, Advertising Sales, John Wiley & Sons, 605 Third Avenue, New York 10158, (212) 850-8832. Advertising Sales, European Contact: Michael Levermore, Advertising Manager, John Wiley & Sons, Ltd., Baffins Lane, Chichester, Sussex PO19 IUD, England.

Manuscripts should be submitted to the Managing Editor, Professor C. L. Suffel, Department of Mathematics, Stevens Institute of Technology, Hoboken, NJ 07030. **Information for contributors** appears in the first and last issue of each volume. **All other correspondence** should be addressed to: *Networks*, Publisher, Interscience Division, Professional, Reference, and Trade Group, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158.

The contents of this journal are indexed in the following: *Compumath, Computers and Control Abstracts, Computing Reviews, Current Contents/Engineering Technology and Applied Sciences, Electrical and Electronic Abstracts,* and *Mathematical Reviews.*

Editorial Production, John Wiley: Don Simmons, Jr.

This journal is printed on acid free paper.

Networks

Subject Index to Volume 22, 1992

All-pair shortest path problem, 21
All-terminal reliability, graph of G, 209
Approximate shortest path algorithms, level graphs, 691

Bar-threading, 523
Bipartite graphs, minimum-cost perfect matchings, 461
Branch-and-bound algorithm, 163
Broadcasting, fault-tolerant, 469
Byzantine link failures, communication reliability, 441

Capacitated arc routing problem, 669
Cell suppression, 397
Census taking, 317
Chordal rings, reliability, 487
Circular multistage interconnection networks, Euler circuits, 523
City street graph, strongly connected orientations, 109
Clique partition, 247
Communication network
  reliability, 653
    with Byzantine link failures, 441
    with unreliable nodes, 369
  terminal pairing, 615
Complementary suppressions, 397
Confidential information, 397
Contractions, parallel, grids for task assignment, 539
Cost ratio cut, 297
Cross-threading, 523
Cutsets, isolated and nonisolated, 487

Datagram networks, 185
Directed Steiner tree problem, 627
Disjoint paths, with different path-costs, 653

Euclidean Steiner minimal tree problem, 55
Euclidean traveling salesman problem, 91
Euler circuits, in shuffle nets and related networks, 523

Facility location problem
  on network subject to single-edge failure, 231
  on tree networks, 217
  tree-shaped, 515
File transfers, scheduling, fully connected networks, 563
Financial flow of funds accounting, 145
Floyd—Warshall Algorithm, 283
Flux cut, 297
Fully connected networks, scheduling file transfers, 563
Funds networks, financial flow, 145

Generalized minimum cut, 297
Gilbert—Steiner trees, degenerate, 335
Gossiping, 317
  fault-tolerant, 469
Graphical Steiner minimal tree problem, 55
Graphs
  bipartite, minimum-cost perfect matchings, 461
  counting k-component forests, 647
  feasible, 385
  grid, strongly connected orientations, 109
  interval, all-pair shortest path problem, 21
  level, approximate shortest path algorithms, 691
  planar
    series-parallel subgraphs, 607
    spanning unicyclic subgraphs, 647
  reliability-improving transformation, 209
  swapping problem, 419
  well-covered, complexity results, 247
Grid graph, strongly connected orientations, 109
Grids, parallel contractions, 539

Heuristic algorithms, finding short paths, 349
Hexagonal contractions, 539
Hungarian method, 461
Hypercube
  leverage problem, 435
  message-routing strategy, 627
  Steiner problem, 1

Information dissemination, sequential, 317

Jacobi's Theorem, 647

k-component forests, counting, 647
k-connected subgraph problem, 607
Kirchoff Matrix Tree Theorem, 647
Knapsack separation problem,
  pseudopolynomial network flow formulation, 503
K-terminal reliability problems, 369

Lagrangean dual problem, 185
l-approximative algorithms, 385
Level graphs, approximate shortest path algorithms, 691
Leverage problem, hypercube, 435

Maze, paths through, 349
Mesh contractions, 539
Message-routing strategy, multicomputer systems, 627
Minieka, tree-shaped facility location problem, 515
Minimal-cost networks, planar sets, 531
Minimax location problems,
  distance-constrained, 37
Minimum-cost perfect matchings, bipartite graphs, 461
Mobile service unit, optimal routing and process scheduling, 163
Multicommodity flow problem, nonlinear, 185
Multicommodity network optimization,
  primal—dual, parametric shortest path problem, 283
Multicomputer systems, message-routing strategy, 627
Multidestination communication,
  message-routing paradigm, 627
Multifacility minimax location problem,
  distance-constrained, 37

Neighborhood tree, 21
Network, fully connected, scheduling file transfers, 563
Network communication, terminal pairing, 615
Network decomposition algorithm, 145
Network flow problem, side-constrained, 503
Network reliability, 209
Node failures
  K-terminal reliability problems, 369
  shortest path problem, 589
NP-complete
  traveling salesman problem, 263
  well-covered graphs, 247

Optimal Communication Tree, 627
Origin—designation pair, 185

Packets, sequential information dissemination, 317
Parallel contractions, grids, 539
Partitioning
  optimal, 297
  VLSI design, 297
"Patching" algorithm, variations, 419
Path-costs, finding disjoint paths, 653
Paths, through maze of rectangles, 349
Permutation graphs, *K*-terminal reliability problems, 369
P-forest problem, 217
Phylogenetic trees, 55
(π,t)-networks, 615
Planar graphs
  series-parallel subgraphs, 607
  spanning unicyclic subgraphs, 647
Planar sets, network costs and degree-five Steiner points, 531
Planar traveling salesman problem, 91
Polynomial order, binary search algorithm, minimax location problem, 37
Polynomial time heuristics, 653
Primal—dual linear programming algorithm, 283
Primary suppressions, 397
Probabilistic Minimum Spanning Tree Problem, 589
Probabilistic Shortest Path Problem, 589
Processor networks, task assignment, 539
Process scheduling, mobile service facility, 163
Pseudopolynomial network flow formulation, exact knapsack separation, 503
Pseudopolynomial time algorithm, 515

Rectilinear Steiner minimal tree problem, 55
Reliability
  all-terminal, 209
  chordal rings, 487
  communications networks, 653
  K-terminal, 369
  networks with Byzantine link failures, 441

Robot, path through rectangle maze, 349
Routing problem
  capacitated arc, 669
  datagram networks, 185
  optimal, mobile service facility, 163

Scheduling
  file transfers, fully connected networks, 563
  process, optimal, mobile service unit, 163
Series-parallel subgraphs, planar graphs, 607
Shortest path problem, 419
  approximate algorithms, 691
  interval graphs, 21
  with node failures, 589
  parametric, 283
Shuffle nets, Euler circuits in, 523
Single-edge failure, facility location on network, 231
Spanning trees, 385
  secondary, mobile servicing, 163
Spanning unicyclic subgraphs, planar graph, 647
Steiner minimal tree, 335
Steiner points, degree-five, 531
Steiner problem, hypercube, 1
Steiner tree, 1
Steiner tree problems
  directed, 627
  survey, 55
Subset interconnection design problem, 385
Swapping problem, 419
Swing surgery, 209

Tabular data, sensitive, 397
Task assignment, processor networks, 539
Terminals, pairing, network communication, 615
Topology, Steiner, 335
Traveling repairman problem, with time windows, 263
Traveling salesman problem
  N-line, 91
  with time windows, 263
Trees
  facility location problem, 515
  networks, distance-constrained multifacility
  minimax location problems, 37
  P-forest problem, 217
  see also Steiner tree
Triangular contractions, 539
Turan problem, 1

Virtual circuit networks, routing algorithm, 185
VLSI design, partitioning, 297

Well-covered graphs, complexity results, 247
